

Reducing patient identification errors while enhancing lean workflow

The small footprint of the SlideMate™ slide printer brings the convenience of on-demand slide printing directly to the microtome. This drastically reduces the chance for patient identification errors by allowing the laboratory to print accurate information at the moment the slide is required.

- **Small footprint fits easily in the work area**
- **On-demand slide printing reduces errors and improves productivity**
- **Prints directly onto the slide, eliminating the need for labels or handwriting**
- **Chemical-resistant media ensures print reliability**
